The Regiment of 1200 men Assembled for Inspection

GENERAL STATEMENT.

The summer session of the Agricultural and Mechanical College of Texas has been established for the following well defined purposes:

1. To provide courses of instruction in all phases of agriculture and in domestic economy, manual training, cotton classing, rural sanitation, rural economics, and rural sociology, for the benefit of teachers, rural min isters, county and local officers, farmers, farm women, rural merchants, and others who may be interested in any phase of agricultural or rural development.

2. To offer to young men having sufficient preparation the opportunity of taking courses for college credit, and also to permit students of the College to remove deficiencies or to pursue further courses toward graduation.

3. To provide instruction for young men who need to review or to take additional work as a preparation for examinations to enter this College.

4. To provide instruction in the various subjects required for State teachers' certificates.

The summer session will begin June 3, 1918.

ORGANIZATION

The work of the 1918 summer session will be given in five divisions as outlined below:

1. THE RURAL LIFE SCHOOL (June 3-July 13.) The work of this division will be given largely by the regular teaching staff of the College, and will include courses in agricultural education, agricultural engineering, rural sanitation, rural sociology, rural economics, agronomy, animal husbandry, dairying, rural home economics, horticulture, farm forging, cotton classing, military science, highway engineering, and the organization and teaching of athletics in secondary schools.

These courses are so planned as to be of special interest to teachers as well as to furnish valuable training for persons not desiring to teach. With the increased demand for vocational training in the secondary and rural school, particularly that pertaining to agriculture and domestic economy, comes the problem of securing adequately trained teachers. It is to this rural life school that these teachers must look for the greater part of this training. They will find in this division opportunities that are unequaled elsewhere in the State for extending their knowledge of these subjects. Not only will the

MITCHELL HALL
Home of the Men in the Summer Session

student have at his command all of the regular teaching equipment and facilities of the College, but to this will be added the opportunity for contact with the research work of the Experiment Station, particularly along the lines of soil fertility, crop production, horticulture, dairying and livestock feeding, breeding and management.

Rural Life Conference.

During the week of June 23 to 29, 1918, a Rural Life Conference will be held at the College. The Conference will consist of two divisions:

1. A Country Life Conference for Ministers.
2. A Country Life Conference for Teachers.

The object of this conference is to bring together the ministers of all denominations and teachers especially interested in the problems of the rural church and rural school. It is proposed to make this conference the clearing house of ideas of the best possible information on the social aspect of rural conditions. The entire problem of developing and directing rural leadership will be considered from every view point. Some of the most notable experts on the rural church and rural school in the United States will come to College for this conference. The program is now being prepared, and a formal announce-

Main Entrance Bernard Sbisa Mess Hall.

ment containing the list of speakers will be available for distribution early in January, 1918.

2. THE SUMMER NORMAL (June 3-July 13.) In this division the subjects required for all the grades of teacher's certificates will be offered, including primary methods.

Instruction will be given by successful school superintendents, assisted by members of the regular teaching staff of the College.

The Summer Normal is organized under the authority of the State Superintendent of Public Instruction. The instruction in the subjects required for teacher's certificates will conform to the outlines, recommended text books, laboratory requirements, etc., of the State Superintendent of Public Instruction. The final examinations will be held on the official dates as authorized by the State Department of Education.

The College offers unusual advantages to teachers who desire not only to build to State certificates of higher grades, but to increase their professional attainments by taking College courses not included in the Normal division.

3. THE COLLEGE (June 3-July 27). In this division courses carrying College credit will be offered

The Cadet Corps Marching to Dinner

for the benefit of the students of this College who desire to make up deficiencies or to take additional work toward graduation and for others who desire College credit. This division will also provide instruction for young men who need to review or to take additional work as a preparation for examinations to enter this College.

Courses carrying college credit will be offered by the following departments: Agricultural Education, Agricultural Engineering, Agronomy, Animal Husbandry, Architecture, Biology, Chemistry, Civil Engineering, Dairy Husbandry, Drawing, Economics, English, Entomology, Horticulture, Mathematics, Modern Languages, and Physics.

The following subjects for entrance credit will be offered: Elementary Agriculture, Mechanical Drawing, Freehand Drawing, English (composition and classics), Civics, American History, Ancient History, Mediaeval and Modern History, English History, Plane Geometry, Algebra, and Solid Geometry.

The right is reserved to withdraw any course for which fewer than five students register.

4. THE SCHOOL OF COTTON CLASSING (June

Lobby of the Y. M. C. A. Building
Center of Social Activities in the Summer Session

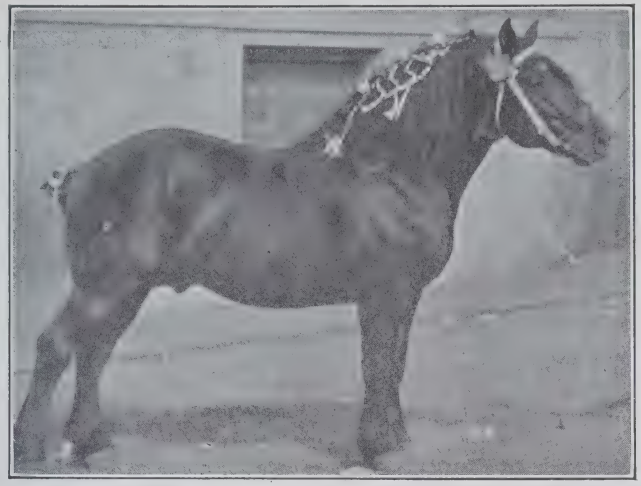
3-July 13.) The object of the School of Cotton Classing is to prepare young men for cotton buying and the managing of cotton warehouses, and to offer to farmers the opportunity to increase their knowledge of the leading farm product of Texas.

A study is made of the elements which determine the commercial grades of cotton; the influences which affect the price of cotton; the system of financing the crop from field to factory, and the relation of exchanges to the business in general. New samples are put each day on the cotton tables for practice, and the work is patterned somewhat after that of a cotton office.

Special attention will be paid to the staple cotton, and an expert in this branch will give instruction in this subject. Many samples of various lengths of staple will be provided for students taking up this branch of the work.

The Government standards for classing cotton, which have been adopted by nearly all the leading exchanges, with the exception of New York, will be used.

5. FARMERS' SHORT COURSE (Last of July; dates to be announced later.) This course is planned to meet the needs of practical farmers, business men and women who desire to farm on a better basis, to make farming



Kermenou, Grand Champion Percheron Stallion, Raised by the Department of Animal Husbandry

more profitable, and to make farm life more comfortable and attractive.

The teaching staff of the Farmers' Short Course will be composed of officers from the teaching division, the Experiment Station and the Extension Service of the College. In addition there will be several speakers of national reputation.

Divisions:

1. **Agriculture**—Separate courses will be offered in the following departments: Agricultural Education, Agricultural Engineering, Agronomy, Animal Husbandry, Dairy Husbandry, Horticulture, Poultry, Plant Diseases and Insects, Veterinary Medicine.

2. **Home Economics**—The work in home economics will be especially adapted to the needs of girls and women from rural communities. The work will consist of lectures and demonstrations in cooking, canning, basket making, and household art.

Entertainment

It is the desire of the College authorities that the Short Course offer the people who attend an opportunity to secure valuable information and at the same time refreshing and wholesome entertainment. The evenings

Representatives of the A. & M. College Hereford Herd
The Results of Scientific Beeding and Feeding.

wlll be given over principally to motion pictures and musicals, and a part of each day will be set aside for special forms of entertainment, including annual Short Course barbecue, reception to women and girls, crowning of the Canning Club Queen, bathing parties, baseball games, etc.

ADMISSION REQUIREMENTS.

In the College division the courses will be offered subject to the same general requirements as in the regular session.

There are no fixed requirements for admission to the Rural Life School, the School of Cotton Classing, or the Farmers' Short Course. Applicants for Summer Normal certificates must meet the legal requirements with reference to age.

DISCIPLINE.

Every student in the summer session is expected to conform to the ordinary rules of propriety and good conduct. Any student whose conduct is unsatisfactory will be required to withdraw. The dormitories set apart for the women will be under the supervision of the pre-

International Live Stock Judging Trophy, Won by A. & M. Students

ceptress, and those for men under the supervision of the commandant.

BOARD AND ROOMS.

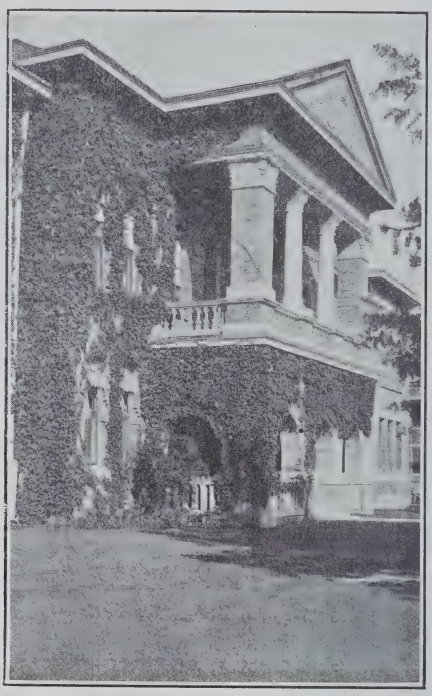
The commodious and well-equipped Bernard Sbisa dining hall will be open to summer school students. This hall is conveniently located with reference to dormitories, lecture room and laboratories.

Rooms will be provided for men in Mitchell and Leggett Halls, and women will be accommodated in Milner Hall. These buildings are new and fireproof, and consist of three stories and basement. If the attendance should justify it, other dormitories will be opened.

The cost of room and board for the term of six weeks will be $42.00. This does not include laundry. Bed linens and towels will be furnished by the student. All beds are single.

LOCATION.

The Agricultural and Mechanical College of Texas is located at College Station, on the Houston & Texas Central Railroad, and on the Ft. Worth division of the Inter-



Work in All Banches of Agriculture Is Carried on During the Summer Months in the Agricultural Building.

national & Great Northern Railroad, 95 miles north of Houston. Both railroads run through the College grounds. The stations are only a short distance from the Academic building. At College Station there are express, telegraph, and money order offices.

COLLEGE FACILITIES.

All the educational facilities of the College will be placed at the disposal of the students of the summer session. The College plant consists of twenty-three brick buildings. Nine of these are used for dormitories and fourteen for purposes of instruction. All buildings used for instruction are well equipped with laboratories. The horticulture gardens, agronomy plots, and greenhouses are located with reference to their convenience, and form a part of the outside facilities for instruction.

The library of the College consists of the central col-

Specimen of the Work Done by Students in the Department of Architecture

Wild Flowers Cover the College Campus Like a Carpet

lection and the several groups of departmental libraries. The general library is housed in the Academic Building and consists of about 15,000 volumes devoted to general literary and reference work. All the leading magazines and a number of daily papers are received at the library. All college departments have well selected technical libraries for the use of students interested in special subjects. The general library will be open during the summer session on week days from 9 a. m. until 5 p. m. and from 8 to 10 p. m. Departmental libraries will be open from 8 a. m. to 5 p. m.

The dormitories and other College buildings contain all modern conveniences, such as electric lights, sewerage connection, running water, etc. Drinking water is supplied by artesian wells. The sanitary condition of the campus is carefully supervised by the College Surgeon, and the health of the College community throughout the year is excellent.

The large swimming pool in the basement of the Y. M. C. A. building will be open for the use of summer session students during the entire session.

PUBLIC LECTURES AND ENTERTAINMENTS.

Lectures on pedagogical, sociological, and agricultural subjects will be given by the members of the teaching staff and by others invited for the purpose. Two

motion picture shows will be given each week. An open air theatre will be provided for all picture shows and other evening entertainments. The Y. M. C. A. will be open all summer and a number of social gatherings will be held in the lobby of this building.

On each Sunday morning a regular Bible school will be conducted at the College, and religious services will be conducted in the College Chapel by a visiting minister.

ORGANIZATION

The work of the summer session will be given in five divisions as outlined below:

1. **THE RURAL LIFE SCHOOL** (June 11-July 21). The work of this division will be given largely by the regular teaching staff of the College, and will include courses in agricultural education, agricultural engineering, agronomy, animal husbandry, dairying, rural home economics, horticulture, farm forging, cotton classing, military science, highway engineering, and the organization and teaching of athletics in secondary schools.

These courses are so planned as to be of special interest to teachers as well as to furnish valuable training for persons not intending to teach. Teachers of agriculture and domestic economy in secondary and rural schools will find in this division opportunities for extending their knowledge of these subjects that are unequalled elsewhere in the State. Not only will the student have at his command all of the regular teaching equipment and facilities of the College, but to this will be added the opportunity for contact with the research work of the Experiment Station, particularly along the lines of soil fertility, crop production, horticulture, dairying and live stock feeding, breeding and management.

2. **THE SUMMER NORMAL** (June 11-July 21). In this division the subjects required for all the grades of teachers' certificates will be offered, including primary methods.

The Swimming Pool, Reading Rooms, Pool Tables, and Other Equipment of the Y. M. C. A., Make Life at the Summer Sessions Very Pleasant.

Instruction will be given by successful school superintendents, assisted by members of the regular teaching staff of the College.

The Summer Normal is organized under the authority of the State Superintendent of Public Instruction. The instruction in the subjects required for teachers' certificates will conform to the outlines, recommended textbooks, laboratory requirements, etc., of the State Superintendent of Public Instruction. The final examinations will be held on the official dates as authorized by the State Department of Education.

The College offers unusual advantages to teachers who

desire not only to build to State certificates of higher grades, but to increase their professional attainments by taking college courses not included in the Normal division.

3. **THE COLLEGE** (June 11-August 4). In this division courses carrying college credit will be offered for the benefit of students who desire to make up deficiencies or to take additional work toward graduation and for others who desire college credit. This division will also provide instruction for young men who need to review or to take additional work as a preparation for examinations to enter this College.

Courses carrying college credit will be offered by the following departments: Agricultural Education, Agronomy, Animal Husbandry, Architecture, Biology, Chemistry, Civil Engineering, Dairying, Drawing, Economics, English, Entomology, Horticulture, Mathematics, Modern Languages, Physics.

The following subjects for entrance credit will be offered: Elementary Agriculture, Mechanical Drawing, Freehand Drawing, English (composition and classics), Civics, United States History, Ancient History, Mediaeval and Modern His-

tory, English History, Plane Geometry, Algebra, Solid Geometry.

The right is reserved to withdraw any course for which less than five students register.

4. **THE SCHOOL OF COTTON CLASSING** (June 11-July 21). The object of the School of Cotton Classing is to

prepare young men for cotton buying and the managing of cotton warehouses, and to offer to farmers the opportunity to increase their knowledge of the leading farm product of Texas.

A study is made of the elements which determine the com-

mercial grades of cotton; the influences which affect the price of cotton; the system of financing the crop from field to factory, and the relation of exchanges to the business in general. New samples are put each day on the cotton tables for practice and the work is patterned somewhat after that of a cotton office.

Special attention will be paid to the staple of cotton and an expert in this branch will give instruction in this subject.

Much Emphasis Is Being Placed on Instruction in Domestic Science and Economy in the Summer Session. This View Gives an Idea of a Competitive Canning Contest Conducted Last Summer in the Open.

Many samples of various lengths of staple will be provided for students taking up this branch of the work.

The Government standards for classing cotton, which have been adopted by nearly all the leading exchanges, with the exception of New York, will be used.

5. **FARMERS' SHORT COURSE** (July 23 to 28, inclu-

sive). This course is planned to meet the needs of practical farmers, business men and women who desire to farm on a better basis, to make farming more profitable, and to make farm life more comfortable and attractive. The work will be given in three subdivisions, as follows:

Agriculture—Separate courses will be offered in the following departments: Agricultural Engineering, Agronomy, Animal Husbandry, Dairy Husbandry, Horticulture, Poultry, Plant Diseases and Insects, Veterinary Medicine.

Home Economics—The work in home economics will be especially adapted to the needs of girls and women from rural communities. The work will consist of lectures and demonstrations in cooking, canning, basket making and household art.

Agricultural Education—This work will be designed especially to meet the needs of the public school teachers of the State who are teaching agriculture.

The teaching staff of the Farmers' Short Course will be composed of officers from the teaching division, the Experiment Station and the Extension Service of the College. In addition there will be several speakers of national reputation.

ADMISSION REQUIREMENTS

In the College division the courses will be offered subject to the same general requirements as in the regular session.

There are no fixed requirements for admission to the Rural Life School, the School of Cotton Classing, or the Farmers' Short Course. Applicants for Summer Normal certificates must meet the legal requirements with reference to age.

DISCIPLINE
